PHOS 15 LT is a compact LED projector with a big impact. The smallest system in our product range is suitable for dry indoor environments and can be flexibly attached to 3-circuit lighting tracks. The compact size makes it easy to install PHOS 15 LT without attracting attention and project a surprising outcome. Its performance will convince you, because the light of the 15 watt LED is focused by a special lens, so that a recommended distance of 2 – 4 m (6.6 – 13 ft) is reached in normal room lighting. Possible locations include bars, lounges, shop windows or rack structures. The projection motif (gobo) can be changed without tools

Configuration

Standard series with high power LED and 85 mm standard lens. The machine is ready to plug in and run. Required accessories: glass gobo with individually designed motif.
